

## QuantaCom Fixed Wireless Plans- Business Plans

About the service QuantaCom Fixed Wireless network is a high-performance network servicing the areas of Geraldton, Rockingham, Bunbury, Perth, Western Australia. It covers all areas of Geraldton, with extensions to areas up to 100km from the Geraldton CBD (including the Abrolhos islands). The Perth network currently covers most areas north of the river and some areas in the hills. Fixed wireless offers high speed internet access. It does not require a phone line, making it ideal for premises that struggle to receive an internet connection through traditional means. The Maximum speeds achievable will depend upon your distance to our transmission towers. Availability depends on the line of sight between your premises and the QuantaCom Fixed Wireless transmission towers. After you signup, we will complete an electronic site survey to determine your eligibility and you will be advised whether you can be connected. This is done at no charge to you. You will require an antenna to be installed on your roof to access this service. The Antenna always remains the property of QuantaCom Pty Ltd.
